

HELP for updating the Progressive Balance

All the accounting units are requested to set right the Closing balance as on 31/3/2011 , in the TWADNEST online FAS System and arrive at the progressive opening balance for the current financial year 2011-2012 using the following sequence of operation.

The Progressive balance is to be updated for both General Ledger and Sub ledger and freeze using the provision given.

Wherever the sub ledgers are applicable, the General ledger balance for a specific head of account should tally with the party wise breakup.

Only after freezing the progressive balance, both for General Ledger and Sub ledger, user will be able to generate the Trial Balance for February'2012.

Further, from the year 2012-2013, users will not be provided with the option of correcting the closing balance, either for individual head of account or party wise closing balance.

Hence all the users are requested to update the closing balance as on 31.3.2011 and progressively update the General Ledger and Sub ledger balances in the TWADNEST / Online FAS system.

Sequence of operations to be done for updating the closing balance and progressive balance updating.

A. LOGIN with user id which has AAO permission
